Vol. 25

Second Quarter, 1946.

Dominion Statistician:

Herbert Marshall, O.B.E., B.A., F.S.S.
Sydney B. Smith, M.A.

Chief, Business Statistics Branch:

CANADIAN FAILURES UNDER THE PROVISIONS OF BANKRUPTCY AND WINDING UP
ACTS IN THE SECOND QUARTER OF 1946.

The number of failures receded to a lower point during the first half of 1946 than in the similar period of any year since the statistics were first collected in 1922. Assignments were reduced to 113 compared with 147, the previous minimum recorded for the first six months of 1945.

The downward trend has persisted since the computation was commenced. As indicated by the inactivity in bankruptcy proceedings, conditions in the current period are obviously favourable for the continuity of business operations. First-half bankruptcies have declined for seven consecutive years.

The highest point in number of failures during the period of observation was reached during the depression following the first world war. Assignments exceeded 1,000 in each of the years from 1929 to 1933, covering the second important depression of the inter-war period.

Bankruptcies in the second quarter numbered 59 being slightly less than in the same period of either 1945 or 1944. Important decline had been shown from 1939 to two years ago, while since that time, the change has been rather insignificant.

The defaulted liabilities which had reached a minimum for the last 24 years during the first half of 1945 showed an increase in the period under review. The total was \$2,511,000 compared with \$1,790,000 in the first six months of 1945. The total for the second quarter rose from \$397,000 to \$1,044,000 in the same comparison. Increased liabilities were recorded in the four provinces reporting failures in the second quarter of both years.

Commercial Failures by Areas. -

During the first six months there was one failure in the Maritime provinces compared with five last year. The situation was improved in Quebec and Ontario, the number dropping from 121 to 96 in the former and from 13 to 10 in the latter. Three failures were shown in the Prairie provinces in each of the last two years and a decline from five to three occurred in British Columbia.

Failures by Branches of Business. -

The failures in trade were greater than in any other groups of the classification, the increase from the first half of 1945 having been from 28 to 31. Failing manufacturing concerns increased from 27 to 30. No change was in evidence for the primary industries where three failures occurred in the first half of each year.

Construction firms numbered nine compared with 26 last year. Defaulting firms in transportation fell from 7 to 6, while the number for the finance group doubled at four. The decline in services of different classes was from 43 to 25.

TABLE 1. NUMBER OF COMMERCIAL FAILURES AND DEFALTED LIABILITIES,

1922 - 1946.

Third Quarter, 1946

Dominion Statistician:

Herbert Marshall
Sydney B. Smith

Chief, Business Statistics Branch:

CANADIAN FAILURES UNDER THE PROVISIONS OF BANKRUPTCY AND WINDING UP
ACTS IN THE THIRD QUARTER OF 1946.

The number of failures receded to a lower point during the first nine months of 1946 than in a similar period of any year since the statistics were first collected in 1922. Assignments were reduced to 177 compared with 202, the previous minimum recorded for the first nine months of 1945, a decline of about 12.4 p.c. having been shown. A downward trend for the nine-month period has been shown for the last seven years.

Commercial failures numbered 64 in the third quarter of 1946 compared with 59 in the second quarter of 1946, and 55 in the third quarter of 1945.

The defaulted liabilities which had reached a minimum for the last 24 years during the first nine months of 1945 showed an increase in the period under review. The total was \$4,265,568 compared with \$2,482,718 in the first nine months of 1945. The total for the third quarter rose from \$693,059 in 1945 to \$1,752,605 for the same period of 1946.

Commercial Failures by Areas.-

During the first nine months there were 3 failures in the Maritime Provinces compared with five last year. In the Province of Quebec, the number of failures dropped from 167 in 1945 to 151 in 1946, a recession of about 9.6 p.c. In Ontario, a decline was again recorded, the number dropping 40 p.c. from 20 in 1945 to 12 in 1946. Four failures were shown in the Prairie Provinces in each of the last two years, while an increase from 6 in 1945 to 7 in 1946 occurred in British Columbia.

Failures by Branches of Business.-

The failures in trade were greater than in any other group of the classification, the increase from the first nine months of 1945 having been from 41 to 45. Defaulting manufacturing concerns increased from 38 to 40. In logging, 3 failures were recorded, mining had 2 and finance 5, while services declined from 52 in 1945 to 42 in 1946.

Sydney B. Smith

CANADIAN FAILURES UNDER THE PROVISIONS OF BANKRUPTCY
AND WINDING UP ACTS IN THE CALENDAR YEAR 1946

The number of commercial failures for the year 1946 was 278, showing a slight increase over the preceding year when the standing was 272. The number may be compared with 260 for 1944, when the lowest point was reached since statistics were first collected in 1922.

The defaulted liabilities showed an increase in the period under review. The total was \$5,966,000 compared with \$3,995,000 in 1945 and \$3,460,000 in 1944, when the minimum liabilities were recorded.

A word should be added as regards the value to be placed upon figures of assets and liabilities. Such values are estimates made by a debtor and, unfortunately, are not uniformly made. The human equation enters into them to a considerable degree and they must be accepted with this qualification.

Commercial Failures by Areas:

During the year there were five failures in the Maritime Provinces, the same as in the preceding year. In Quebec, the failures increased from 225 in 1945 to 236 in 1946; while in Ontario the number dropped from 27 to 20. In the Prairie Provinces a betterment was shown, the number dropping from 7 in 1945 to 5 in 1946; while in British Columbia failures increased from 8 in 1945 to 12 in 1946.

Failures by Branches of Business:

The failures in trade were greater than in any other group of the classification, the increase from 1945 having been from 58 to 77. Failing manufacturing concerns increased from 54 to 57; while in agriculture, logging and mining, the failures rose from 5 in 1945 to 9 in 1946.

Construction firms fell from 39 in 1945 to 32 in 1946 and in transportation 14 occurred, compared with 12 in the preceding year. Seven failures were shown in finance during 1946, one more than in 1945. The decline in services of different classes was from 70 to 64.

Vol. 26

3-3051

First Quarter, 1947

Dominion Statistician:
Chief, Business Statistics Branch:

Herbert Marshall
Sydney B. Smith

COMMERCIAL FAILURES IN THE FIRST QUARTER OF 1947

Commercial failures in the first quarter of 1947 rose to 120, a larger number than in the same period of any year, since 1943. This number is considerably lower than in pre-war years, comparing with 371 for the first quarter of 1939. Concerns failing were more than twice as numerous as in the first quarter of 1946, when the number was 54, and may be compared with 83 and 94 for the years 1945 and 1944 respectively.

The liabilities for the first quarter of the year aggregated \$1,481,807, compared with \$1,467,014 in 1946, a slight falling off being noted in this comparison. An increase occurred in liabilities when compared with the same periods of 1945 and 1944. Liabilities for the same period of the last pre-war year of 1939 having been \$3,592,118, a considerable decrease is shown in the quarter under review.

Commercial Failures by Areas:

During the quarter, there were three failures in the Maritime Provinces, compared with none in the same period of the preceding year. In Quebec, the failures increased from 43 in 1946 to 98 in 1947, while in Ontario there were 15 for the period under review, compared with 4 for the same months of 1946. No failures were shown for the Prairie Provinces, while in British Columbia the number increased from one in 1946 to four in 1947.

Failures by Branches of Business:

Failures in trade were greater than in any other group of the classification, the increase from 1946 having been from 16 to 37. Failing manufacturing concerns increased from 16 to 34, while in agriculture, logging and mining, the failures rose from 2 in 1946 to 5 in 1947. The increase in services of different classes was from 12 in 1946 to 17 in 1947.

COMMERCIAL FAILURES IN THE FIRST QUARTER OF 1946

Bankruptcies, owing to favourable economic conditions, reached a new low level in the first quarter of the present year. A downward trend has persisted since the computation was first effected in 1922 and consecutive declines have been shown year by year since the corresponding period immediately preceding the last war. As indicated by the avoidance of bankruptcy proceedings, war conditions were obviously favourable for the continuity of business operations.

Failures were numerous in the depression period following the first world war. A marked decline was shown from 1923 to 1926 when assignments reached a low point for the period. First quarter failures again reached a minimum in 1937, the culmination of an intermediate economic cycle. The decline has been continuous from 1939, following the appreciable increase of the two preceding years.

Failures dropped to 54 in the first quarter of the present year compared with 83 in the same period of 1945. The number was less than in the first quarter of any other year since 1922 when the statistics were first collected. The largest number for the first quarter during the period of observation was 1,100 recorded for 1923.

The liabilities of firms and individuals making assignments during the first quarter were \$1,467,000 compared with \$1,393,000 in the same period of 1945. Liabilities have shown a downward trend since 1923 when the computation was commenced.

A word should be added as regards the value to be placed upon figures of assets and liabilities. Such values are estimates made by a debtor and unfortunately are not uniformly made. The human equation enters into them to a considerably degree and they must be accepted with this qualification.

Failures among trading establishments are normally more numerous than in other main groups. Failures of trading establishments receded from 23 to 16 in the period under review. In manufactures the number at 16 was unchanged from the same period of 1945. The decline in services of different classes was to 12 from 19 last year, while a decrease from 21 to 9 was shown in other activities.

There were no failures in the Maritimes during the first quarter contrasting with three last year. The decline in Quebec was from 63 to 48, while only 4 were reported for Ontario against 11 one year ago. In the list for the Prairie Provinces, one failure was recorded in Alberta last year, while one is again shown in the elapsed period of 1946. One failure occurred in British Columbia against three failures one year ago.

CANADIAN FAILURES UNDER THE PROVISIONS OF BANKRUPTCY AND WINDING UP ACTS IN THE THIRD QUARTER OF 1947.

Concerns failing in the third quarter of 1947 rose to 136, a larger number than in the same period of any year since 1942. Despite the sharp increase over the third quarter of 1946, failures were considerably lower than in the same period of pre-war years, comparing with 343 for the third quarter of 1939. Defaulting firms were more than twice as numerous as in the same period of 1946, when the number was 64, and may be compared with 55 and 57 for the years 1945 and 1944, respectively.

Current liabilities for the third quarter of the year aggregated \$2,596,741 compared with \$1,752,605 for the same period of 1946, a sizable increase being noted in this comparison. This is the highest total for the period under review since the pre-war year, 1939, when liabilities were \$3,789,520.

Comparisons With the First Nine Months of 1946.

Failures rose appreciably in the first nine months of 1947, the number, 402, being greater than in the same period of any year since 1942. The increase over the first nine months of 1946 was about 227 p.c., the total for that period having been 177.

Commercial Failures by Areas.

During the first nine months, there were 13 failures in the Maritime Provinces compared with three last year. In the Province of Quebec, the number of failures at 310 in 1947 was more than double the 151 reported for 1946.

In Ontario, an advance was recorded, the number increasing from 12 in 1946 to 51 in 1947. Nine failures were shown in the Prairie Provinces compared with 4 in the same period of 1946, while in the Pacific Province failures also showed a sizable increase, rising from 7 in 1946 to 19 in 1947.

Failures by Branches of Business.

In trade, failures totalled 111, compared with 45 in the same period of last year. Failing manufacturing establishments increased from 40 to 118. Nine failures were reported in the primary industries where five failures occurred in the first nine months of the preceding year, while services increased from 42 in 1946 to 66 in 1947.

CANADIAN FAILURES UNDER THE PROVISIONS OF BANKRUPTCY
AND WINDING UP ACTS IN THE CALENDAR YEAR 1947

The advance in the number of commercial failures and the amount of defaulted liabilities continued in 1947 for the third consecutive year. The lowest level in the period covered by official records was shown in 1944 when war activity reduced business fatalities to a minimum. The number of failures in 1947 was nearly double that of the preceding year. Minor increases had been shown in 1945 and 1946. The failures rose from 278 in the latter to 545 last year, and the gain in liabilities was from \$5,966,000 to \$10,078,000.

A declining trend was in evidence from 1923 to the present time in both failures and liabilities. The factors were at particularly high levels during the depression following the first world war. The prosperous periods culminating in 1923-9, 1937 and 1944, led to a marked reduction in bankruptcy proceedings. A greater number of failures reflected the depressed economic conditions of the early twenties, and from 1930 to 1933.

The fluctuations in liabilities followed the general pattern of the number of failures. The extent of the cyclical movements in the former, however, were relatively less pronounced from the early thirties to the present.

Commercial Failures By Areas

During the year there were 15 failures in the Maritime Provinces as compared with 5 in the preceding year. The failures in Quebec increased from 236 in 1946 to 422 in 1947, while in Ontario the number was augmented from 20 to 72. In the Prairie Provinces, a considerable increase was also shown, the failures numbering 12, compared with 5 in 1946, while in the Pacific Province, failures increased from 12 to 24.

Failures By Branches of Business

The failures in trade numbered 153, compared with 77 for the preceding year. Failing manufacturing concerns increased from 57 to 152, while in the primary industries, the number rose from 9 in 1946 to 13 in 1947.

Construction firms increased from 32 to 57, and in transportation 20 failures occurred, compared with 14 in the preceding year. Five failures were shown in finance for the year, and 92 in services of different classes.

Sydney B. Smith

COMMERCIAL FAILURES IN THE FIRST QUARTER OF 1948

Commercial failures in the first quarter of 1948 rose to 203, a larger number than in the same period of any year since 1942. This number is considerably lower than in pre-war years, comparing with 371 for the first quarter of 1939. When the number of failures for 1948 is compared with 120 for the same period of 1947, and 54 and 83 for 1946 and 1945, respectively, a decided increase is noted.

The liabilities for the first quarter of the year aggregated \$3,405,855, compared with \$1,431,807 in 1947, a considerable increase having been shown. An advance occurred in liabilities over the same periods of 1946 and 1945. Liabilities for the same period of the last pre-war year of 1939 having been \$3,592,118 a decline was shown in the quarter under review.

Commerical Failures by Areas:

During the quarter, there were 4 failures in the Maritimes, compared with 3 in the same period of 1947. In Quebec, the failures increased from 98 last year to 157 in 1948, while in Ontario there were 31 in the period under review, compared with 15. Three failures were shown in the Prairie Provinces while in British Columbia the number doubled from 4 in 1947 to 8 in 1948.

Failures by Branches of Business:

Failures in trade were greater than in any other group of the classification. the increase from 1947 having been from 37 to 67. Failing manufacturing concerns increased from 34 to 39, while the advance in services of different classes was from 17 to 42.

COMMERCIAL FAILURES IN THE SECOND QUARTER OF 1948

Concerns failing in the second quarter of 1948 rose to 222, a larger number than in the same period of any year since 1941. Despite the sharp increase over the second quarter of 1947, failures were considerably lower than in the same period of pre-war years, comparing with 346 for the second quarter of 1939. Concerns failing showed an increase of about 52 p.c. over the same period of 1947, when the number was 146, and may be compared with 59 and 64 for the years 1946 and 1945 respectively.

Estimated current liabilities for the second quarter of the year aggregated \$3,716,852 compared with \$3,101,753 in the same period of 1947, an increase being noted. This is the highest total for the period under review since the pre-war year, 1939, when liabilities aggregated \$4,189,660.

Comparison With the First Six Months of 1947.

Failures rose appreciably in the first half of 1948, being greater than in the same period of any year since 1941. The 425 failures however, were less than in the first half of the previous years of the period of observation from 1922 to the early part of the second world war. The increase over the first half of 1947 was about 60 p.c., the total for that period having been 266.

During the first six months there were six failures in the Maritime Provinces compared with six last year. In Quebec and Ontario, the number rose from 212 to 323 in the former and from 32 to 67 in the latter. Twelve failures were shown in the Prairie Provinces, compared with six the preceding year, and an increase from 10 to 17 occurred in the Pacific Province.

In trade failures totalled 154, compared with 74 in the same period of last year. Failing manufacturing establishments increased from 77 to 92. Nine failures were reported in the primary industries where nine failures also occurred in the first half of the preceding year. Thirty-seven failures were reported in construction and 16 in transportation.

CANADIAN FAILURES UNDER THE PROVISIONS OF BANKRUPTCY AND WINDING UP ACTS IN THE THIRD QUARTER OF 1948

Concerns failing in the third quarter of 1948 rose to 181, a larger number than in the same period of any year since 1941. The number of failures showed an increase of about 33 p.c. over the same period of 1947, when the number was 136, and may be compared with 64 and 55 for the years 1946 and 1945, respectively. Despite the sharp increase over the third quarter of 1947, failures were considerably lower than in the same period of pre-war years comparing with 343 for the third quarter of 1939.

Estimated current liabilities for the third quarter of the year were \$4,140,000 compared with \$2,597,000 in the same period of 1947, a considerable increase being noted in this comparison.

The First Nine Months of 1948

Failures rose appreciably in the first nine months of 1948, the number 606, being greater than in the same period of any year since 1941. The increase over the first nine months of 1947 was about 51 p.c., the total for that period having been 402. The estimated liabilities for the nine months totalled \$11,262,000 compared with \$7,130,000 for 1947. This is the highest total for the nine months since the pre-war year, 1939, when liabilities were \$11,571,000.

Commercial Failures by Areas

During the first nine months, there were 15 failures in the Maritimes compared with 13 last year. In Quebec, the number of failures at 463 showed a considerable increase when compared with 310 reported for 1947.

In Ontario, an advance was recorded, the number increasing from 51 in 1947 to 84 in 1948. Fifteen failures were shown in the Prairie provinces, compared with 9 in the same period of 1947, while in the Pacific province failures also showed a sizable increase, rising from 19 in 1947 to 29 in 1948.

Failures by Branches of Business

In trade, failures totalled 207 during the nine months compared with 111 in the same period of last year. Failing manufacturing establishments increased from 118 to 142. Eleven failures were reported in the primary industries, where 9 failures occurred in the first nine months of the previous year, while services increased from 66 to 111.

CANADIAN FAILURES UNDER THE PROVISIONS OF BANKRUPTCY AND WINDING UP
ACTS IN THE CALENDAR YEAR 1948.

Commercial failures in 1948 reached the highest level recorded since 1941 and showed an increase of almost 50 per cent over 1947. Liabilities amounted to \$15.7 million which is an increase of 56 per cent over the preceding year. However, the number of failures in 1948 was considerably less than in the pre-war year of 1939 when they reached 1,392 although the amount of liabilities involved was \$635,000 greater than in the earlier year.

Commercial Failures by Areas.

In the Maritimes, 23 failures occurred last year compared with 15 in 1947. The number in Quebec rose from 422 to 613 but the relative increase of 45 per cent was smaller than in any of the other areas. Ontario showed an increase of 61 per cent over 1947 compared with 67 per cent in the Prairie Provinces. British Columbia, where the number rose from 24 to 41, recorded the greatest percentage increase, being 71 per cent higher than in 1947.

Branches of Business.

Trade accounted for the greatest number of failures increasing from 153 in 1947 to 289, a gain of 89 per cent. Failures in manufacturing concerns numbered 188, an increase of 24 per cent over the preceding year. There were 144 failures in services of all classes, showing a 57 per cent increase.

Three failures occurred in mining and construction firms showed a 35 per cent increase over 1947. Failures in transportation and public utilities numbered 30 compared with 20 in the preceding year.

CANADIAN FAILURES UNDER THE PROVISIONS OF BANKRUPTCY AND WINDING
UP ACTS IN THE FIRST QUARTER OF 1949

Commercial failures in Canada during the first quarter extended the trend of the last three years. Following the low levels, characteristic of the war period, the number of failing concerns has risen steadily since the early months of 1946. Many of the smaller firms which commenced operations after the war were not in a sufficiently strong financial position to meet the difficulties of establishing themselves on a permanent footing.

The level in January was higher than in any other month since February 1941. The important increase over any month in the last seven years suggests the recurrence of the inter-war seasonal pattern. The first month of the year, when business operating results are closely appraised, is normally the period of the greatest number of failures.

Failures numbered 270 in the first quarter, having been greater than in the same period of any year since 1941. The total during the first three months of that year was 294. Referring to first quarters, the decline was continuous year by year until 1946 when the low point of 54 was reached. The situation has worsened during the last three years, the trend showing a marked upward movement.

The liabilities of defaulting firms were greater in the first quarter than in the same period of any year since 1936, when Canada was recovering from a severe depression. The total was \$4,196,000 compared with \$4,483,000 in the first quarter of the year quoted for comparison. The lowest level of the thirteen-year period was reached in 1944, the last full wartime year. The standing in the first quarter of that year was \$1,186,000.

Failures were greater in each of the four main economic groups of the classification. Trading concerns failing in the first quarter numbered 93 against 67 in the same period of 1948. The increase in manufactures was from 39 to 57 while service firms of different descriptions were 21 p.c. greater at 51. The miscellaneous group including construction and transport showed failures of 48 against 30 in the same period of last year.

The majority of the failures occurred in Quebec, the increase over the first three months of 1948 having been about 30 per cent. The gain in Ontario was comparatively slight, but the average liability per defaulting firm was relatively greater than in the first quarter of last year.

Comparison with Unemployment

The fluctuation in commercial failures may be compared with the changes in unemployment, both factors being inverse to the majority of movements indicating the alternation of prosperity and depression. The unplaced applicants recorded by employment offices rose in the first quarter to a higher position than for some time. Unfilled vacancies receded to a low point in the first two months of the year followed by a slight gain in March. During the first quarter, the number of failures and of unplaced applicants indicated a minor change in the level of prosperity in evidence from the beginning of the last world war. The results from the first month of 1948 are shown in the chart appearing on page 9.

United States Failures

The fluctuations in the number of commercial failures in Canada resembled during recent years, the movement in the United States. The direction of change from year to year from 1935 to the present has been identical. Increases were limited to 1938 and 1939 and to the last three years, while declines were general in both countries in the other eight years of the period. Fluctuations tended to be relatively greater in the United States than in Canada. The correlation between the two series as computed by the usual method, is excellent.

CANADIAN FAILURES UNDER THE PROVISIONS OF BANKRUPTCY AND WINDING

UP ACTS IN THE SECOND QUARTER OF 1949

Commercial failures in the second quarter of 1949 rose to 230, a larger number than in the same period of any year since 1941. Although reaching an eight-year high for the second quarter, failures were considerably lower than in the similar period of pre-war years, comparing with 346 in the total for April, May and June, 1939. Concerns failing showed an increase of 3.6 per cent over the second quarter of 1948 when the number was 222 and may be compared with 146 and 59 for the years 1947 and 1946, respectively.

Compared with 270 for the first quarter of this year, a decline of 17.4 per cent is noted. This drop suggests the recurrence of the pre-war seasonal pattern when the first months of the year normally led all others in failures, following a close appraisal of business operating results for the preceding year.

The liabilities of defaulting firms in the second quarter amounted to \$4,530,000, greater than in the same period of any year since 1935, and a sharp rise from the second quarter of 1948 when they totalled \$3,717,000.

The First Six Months of 1949.

Failures in the first half of this year were the highest for the period since 1941. The total was 500 compared with 555 in the first six months of the year quoted for reference and with 717 in the same period of 1939. The decline in failures since 1941 was continuous year by year until 1946 when the low point of 113 was reached after which the trend showed a marked upward movement.

Keener competition is now forcing out of business many concerns which entered the field during the period of post-war prosperity with limited financial reserves.

The estimated liabilities in this period amounted to \$8,725,000 a gain of 22.5 per cent over 1948 and the highest for the first six months of any year since 1934 when the economy was just starting to recover from its lowest levels. The average liability per defaulting firm was about four per cent greater than in the same period last year.

Commercial Failures by Areas

During the first six months all areas except Ontario showed increases in failures as compared with the first half of 1948. There were eleven failures in the Maritimes as against six last year. Quebec showed an increase of 57 to record a post-war high of 380, while the number of failures in Ontario declined from 67 to 59 in the same comparison. In the Prairie Provinces 17 firms defaulted compared with 12 in the preceding year and failures in British Columbia nearly doubled when 33 concerns were declared bankrupt in the first half.

Failures by Branches of Business

Nearly all branches of business showed increases in failures in the first six months as compared with the same period last year. Trade and manufactures were up 14 per cent and 21 per cent respectively in number of bankruptcies and the primary industries, taken in total, increased from nine to twelve. Failures in construction totalled 40 compared with 37 last year and transportation was up from 16 to 23. Whereas there were no failures during the first half of last year in finance, there were 10 reported for the first six months of 1949. An increase of 21 per cent was noted in services when bankruptcies totalled 92 as compared with 76 in the same period last year.

CANADIAN FAILURES UNDER THE PROVISIONS OF BANKRUPTCY AND WINDING

UP ACTS IN THE THIRD QUARTER OF 1949

During the third quarter of 1949, failures in Canada numbered 239, higher, for this period, than in any other year since 1940. Following the low levels of the war period, the number of defaulting firms has increased steadily since 1946. The gain over the third quarter last year was about 32 per cent, when 181 concerns were declared bankrupt. Despite this sharp increase, the number of failures was considerably lower than in the same period of pre-war years, comparing with 343 for the third quarter of 1939.

Estimated liabilities of failing concerns for the period under review amounted to \$6,418,000 against \$4,140,000 in the third quarter of 1948, a gain of about 55 per cent.

The first Nine Months of 1949.

Failures rose sharply in the first nine months of 1949, the number, 739, having been greater than in the corresponding period of any year since 1941 when the total was 772. Subsequently, the decline was continuous year by year until 1946 when the low point of 177 was reached. During the last three years, the trend has shown a marked upward movement. It appears that growing competition is forcing out of business many firms which commenced operations during the period of post-war prosperity with limited financial reserves, insufficient experience and ability, or both.

Liabilities during the first nine months totalled \$15,144,000, a gain, over the same period last year, of 34 per cent. This is the highest for the three quarters since 1934 when liabilities amounted to \$17,814,000. At that time, the number of failures, 1,159, was much higher than the 739 reported in 1949. Thus, the average amount of liabilities per failure is considerably greater than pre-war, indicating that, in general, more capital investment is now required to operate a business.

Commercial failures by Areas.

All economic areas except the Maritime Provinces recorded increases in failures during the first nine months of 1949 when compared with the same period last year. The Prairie Provinces and British Columbia showed the sharpest percentage gains. In the former, the number of defaulting firms rose from 15 to 23 and in the latter, from 29 to 44. In Quebec, the number of failures increased from 463 to 571, an advance of more than 23 per cent, while Ontario showed a relatively minor gain, the total having been 89 against 84 in the corresponding period of 1948. There were only 12 failures reported in the Maritime Provinces compared with 15 last year.

Failures by Branches of Business.

Failures were greater in all branches of business during the first nine months. Bankrupt trading concerns numbered 265 against 207 in the same period of 1948. The increase in manufactures was from 142 to 155 while failures of service firms were 26 per cent greater at 140. Fifteen bankruptcies were reported in the primary industries, a gain of four. In construction, the total was 64 against 56 last year and in transportation, it rose from 24 to 30. Failures numbered 16 in finance compared with 4 in the corresponding period last year.

Minister of Trade and Commerce

Prepared in the Business Statistics Section
Dominion Bureau of Statistics, Ottawa

COMMERCIAL FAILURES UNDER THE PROVISIONS OF BANKRUPTCY
AND WINDING UP ACTS IN THE YEAR AND THE FOURTH QUARTER OF 1949

The number of commercial failures under the provisions of Bankruptcy and Winding Up acts in Canada in 1949 was 1,066. Liabilities amounted to more than \$21 million; assets to almost \$16 million. The greatest number of failures were reported in Trade, followed by Manufactures and Service. Failures in primary industries increased from 16 to 28 during the period. Construction reported 94 failures and transportation 46.

The Charts

In Section A and B of the accompanying chart are shown the annual fluctuations of the number of failures and the amount of liabilities for the period 1923 to 1949. The deviations from the average were expressed in terms of units of standard deviation, and the results plotted to show the fluctuations from the average, or zero line. Section C shows the line of regression between the number of failures and the amount of liabilities for the same period.

Failures of Employees

The number of failures reported by wage-earners during the year was 124 out of the total of 1,066. The greater number of these, 118, occurred in Quebec while 2 were reported in each of the provinces of Ontario and British Columbia and in the Maritime area.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts which the statistics of this report cover. Relevant legislation includes the Farmers' Creditors Arrangement Act, The Companies' Creditors Arrangement Act and various provincial Bulk Sales Acts. Statistics are not available for cases dealt with under these Acts.

3-3050 Vol. 29, No. 1

\$1.00 per Year.

COMMERCIAL FAILURES

First Quarter, 1950

Commercial failures during the first quarter of 1950 were 41 per cent greater than in the same period of 1949. The total number of bankruptcies was 382, the most unfavourable for any first quarter since 1934. Liabilities amounted to \$6,307,156 as compared with \$4,195,655 last year and were slightly greater than the amount shown for 1934.

Industrial Distribution.

During the period under review, failures in trade accounted for 149, manufactures 81, while in service there were 89. Transportation failures numbered eight, the latter having been the only main industrial group showing a decrease as compared with the first quarter last year.

The Provinces.

The largest number of failures occurred in Quebec where 308 were reported. In Ontario there were 45 and in British Columbia 17. The Maritimes accounted for eight and Alberta of the Prairie area reported four. Wage-earners in Quebec recorded 31 failures. In each of the provinces of Ontario and British Columbia there was one failure in this category. This report relates to failure data under the provisions of the Bankruptcy and Winding Up Acts including a number of wage-earners.

The Chart.

In the accompanying chart, the number, liabilities and average liability per failure are depicted by months since January, 1948. The number in the last half of 1949 was consistently at a higher level than in the same months of the preceding year. The striking feature of the chart was the high position of the number and liabilities during the first quarter of this year. The average liability per failure during the first quarter was very similar to the average for the same period of the two previous years.

COMMERCIAL FAILURESUNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTSSecond Quarter, 1950

1

The advance in commercial failures in evidence for the last four years was continued in the first half of 1950. The increase in the number was 44 p.c. over the first six months of last year. The total was 720 compared with 500 in the first half of 1949. The aggregate for the first six months of 1948 was 425, an increase of 69 p.c. having been indicated.

The defaulted liabilities at \$12.4 million were 42.6 p.c. greater than in the first half of 1949. The average liability this year was \$17,281, not greatly changed from the standing of the first six months of 1949.

The Second Quarter

Failures and liabilities were also considerably greater in the second quarter than in the same period of last year. The failures numbered 338 compared with 230 one year ago. The liabilities rose from \$4.5 million to \$6.1 million, the increase having been 35 p.c.

Industrial Trend

A marked increase was shown in failures in trading activities. The advance was 63 p.c. over the second quarter of last year. The miscellaneous group including primary industries, construction and transport was less prominent with a relative gain of 30 p.c. The increases in manufactures and services were 24 p.c. and 39 p.c., respectively.

Economic Areas

The failures increased in each of the five economic areas except British Columbia. The number in the Maritimes was 10 during the second quarter against two only in the same period of 1949. Fatalities in Quebec rose from 176 to 258. The standing in Ontario was 40 compared with 26 one year ago. The total for the Prairie Provinces rose to 13 compared with 9, while the number for British Columbia was unchanged at 17.

The Charts

The fluctuations of failures and liabilities naturally show an inverse movement to that of the great majority of other economic factors. Unemployment, measured by the number of unplaced applicants reported by employment offices, as indicated in the chart of this issue, tends to follow a similar movement. The average liability per failure was greater in the years from 1946 to 1949 than from 1935 to 1945.

3-3050 Vol. 29, No. 3

\$1.00 per Year

COMMERCIAL FAILURES
UNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTS
Third Quarter, 1950

Commercial failures in Canada showed some evidence of levelling off in recent months. The number was at a somewhat lower level in the third quarter than in the second. Failures numbered 248 compared with 338 in the second quarter of the present year. The decline of 26.6 per cent may be significant of a change in the trend of the failure situation. The low point, from an annual footing, was reached in 1945 and the trend of failures has been upward until the first half of the present year. The decline in the third quarter reflects the improvement in economic conditions.

Owing to the impact of the first six months, the failures, for the elapsed portion of the present year, are still in excess over the same period of 1949. In the first three quarters of 1950, failures numbered 968 against 739 in the same period of last year, the number having been nearly one-third larger.

Industrial Trend

Failures in trading establishments in the third quarter numbered 93 against 89 in the same months of last year, a gain of 4.5 per cent. The increase in failures of manufacturing concerns was insignificant, the total having been 45 compared with 44. The record for services was not so favourable, seeing that failures numbered 57 compared with 48, a gain of 18.8 per cent in this comparison. The other classifications, as well as the unclassified, showed declines from last year. The net result was that the aggregate was 3.8 per cent more than in the third quarter of 1949.

Economic Areas

The failures in Quebec receded from 191 in the third quarter of last year to 169 in 1950. The number in the Prairies was unchanged at 6. A considerable increase was shown in the Maritimes, while the Ontario figures rose from 30 last year to 47 in the recent quarter. The gain in British Columbia was from 11 to 14. The net increase for the third quarter was limited to 3.8 per cent.

The Charts

It is assumed that commercial failures are numerous in depressed times and scanty in times of prosperity. Correlation is shown between the number of commercial failures and the number of the unemployed, especially during the period from 1933 to 1946. Commercial failures were relatively high from 1923 to 1929, while the number of unemployed seeking work was at a low level. The average liability per failure was at a high level from 1923 to 1932 and that experience has been again in evidence in the last four years.

COMMERCIAL FAILURESUNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTSFOURTH QUARTER AND YEAR, 1950

The number of commercial failures was greater in 1950 than in any other year since 1939, the fatalities exceeding the levels of each of the previous ten years. The intervening period was characterized by a low level of failures. A downward movement was in evidence from 1939 to 1945 when the last world war ended and an upward fluctuation developed from that time to the present.

Owing to important changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the statistics for the last half of 1950 are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with the statistics of bankruptcies. In several tables, however, and in the charts, the numbers are shown so as to give a general impression of the trend.

The liabilities, excluding the records of the proposal section in the last half of the year, were greater during 1950 than in any similar period since 1933. The total was \$24,872,000 compared with \$21,356,000 in the preceding year. The liabilities of 1933, when a severe depression was in evidence, reached the high level of nearly \$33 million. No other similar period in the intervening span of sixteen years showed a higher total than 1950.

The Chart.

In sections A and B of the accompanying chart, the numbers of failures are shown by quarters from 1923 to the present and by months from January, 1948 to December, 1950. For the purpose of comparability the number of proposals for the last half of the year under review are included with the bankruptcies proper. The liabilities of bankrupt persons and companies are shown by months from January, 1948. The totals for insolvents making proposals according to the new act are not available.

Industrial Trend.

Leaving the number under the proposal section out of account, each of the main industrial divisions showed increases in 1950 over the preceding year. The numbers failing in the trading division were 502 in 1950 against 374 in the preceding year. The increase in manufacturing concerns was about 11 percent, to 257. Bankruptcies in the services advanced from 203 to 273 and the miscellaneous groups rose from 187 to 193.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts to which the statistics of this report relate. Relevant legislation includes the Farmers' Creditors Arrangement Act, The Companies' Creditors Arrangement Act and various provincial Bulk Sales Acts. Statistics are not included here for cases dealt with under this legislation.

COMMERCIAL FAILURES

UNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTS

FIRST QUARTER 1951

Failures in Canada during the first quarter of 1951 numbered 400, an increase of five percent over the same period last year and the most unfavourable showing for any first quarter since 1934. Liabilities involved amounted to \$6.4 million as compared with \$6.3 million in 1950 and \$6.1 million in 1934. Since the first quarter of 1946, when failures for the period were the lowest on record, the number of insolvencies has been increasing steadily.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data for recent months are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Since July 1950, agreements made under this method are not included with the statistics of bankruptcies. In table 6 of this report, however, the number of proposals is shown so as to give a general impression of the trend. Liabilities of insolvent persons making such agreements are not available.

Industrial Distribution.

The over-all gain in failures during the first quarter of 1951 as compared with the corresponding period last year was due to increases in the trade and construction sectors. Insolvencies of trading establishments totalled 168, a gain of 19 over 1950. Failures in construction numbered 39 compared with 26 during the first quarter last year. There was a slight decline in manufacturing and a drop of more than 12 percent in the number of bankruptcies in the services field. The net result was an aggregate gain of about five percent as compared with the first quarter of 1950.

Economic Areas.

The failures in Quebec receded from 308 in the first quarter of last year to 299 in 1951. As mentioned above, the latter figure does not include proposals. During the first three months of this year, proposals in Quebec numbered 49. The total for Canada was 51. The Atlantic Provinces recorded a gain of 5, including 2 in Newfoundland, data for which were not included last year. The Ontario figures rose from 45 in 1950 to 58 in the recent quarter while failures in British Columbia were practically unchanged. The gain in the Prairie Provinces was from 4 to 14, due mainly to the 9 failures reported in Manitoba. There were no failures in this province during the first quarter of 1950.

Insolvency.

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts to which the statistics of this report relate. Relevant legislation includes the Farmers' Creditors Arrangement Act, the Companies' Creditors Arrangement Act and various provincial Bulk Sales Acts. Statistics are not included here for cases dealt with under this legislation.

OTTAWA

Published by Authority of the Rt. Hon. C. D. Howe, Minister of Trade and Commerce

3-3050 Vol. 30 No. 2

\$1.00 per Year

COMMERCIAL FAILURESUNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTSSECOND QUARTER 1951.

The number of failures in Canada during the second quarter of 1951 was 318, representing a decline of 6 per cent from the total of 338 registered in the corresponding period last year. The estimated total of liabilities also dropped slightly, having stood at \$5,835 thousand compared with \$6,135 thousand in the second quarter of 1950.

During the first six months of 1951 commercial failures numbered 718, showing virtually no change from the 720 recorded in the same period of 1950. In the same comparison, liabilities totalled \$12,254 thousand against \$12,441 thousand, a decline of less than 2 per cent. The levels of both failures and liabilities in the first half of 1950 were higher than in any comparable period since 1934. The average liability this year stood at \$17,067 compared with \$17,279 in the corresponding period last year.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data for the past 12 months are not comparable with preceding periods. Since July 1950, proposals from insolvent persons are not included with the statistics of bankruptcies. In table 6 of this report, however, the number of proposals is shown so as to give a general impression of the trend.

Failures by Industries

There were fewer insolvencies in manufacturing and service businesses during the first six months of 1951 than in the same period last year. Failures of manufacturing enterprises numbered 137 compared with 148 in the first half of 1950, and bankruptcies in the services field declined from 146 to 139. In the same comparison, defaults of trading establishments rose more than 6 per cent to 303. There were 67 failures in construction compared with 51 last year.

Failures by Economic Areas

Bankruptcies in Quebec province declined nearly 7 per cent, from 566 to 529, in the six months comparison. As explained previously the 1951 figures do not include proposals, the bulk of which are registered in Quebec. In the first half, the total number of proposals was 102. Failures in Ontario rose 27 per cent to 108. Increases were also recorded in the Atlantic and Prairie regions, the number in the Atlantic Provinces having risen from 18 to 23 and in the Prairies from 17 to 24. Insolvencies in British Columbia remained unchanged at 34.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

Prepared in the Business Statistics Section.

COMMERCIAL FAILURESUNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTSTHIRD QUARTER 1951

During the third quarter of 1951 failures under the provisions of the Bankruptcy and Winding Up Acts numbered 312 as compared with 248 during the same period of 1950, an increase of nearly 26 per cent. The estimated total of liabilities was \$6,341 thousand, or more than 9 per cent higher than in the corresponding period last year.

Failures during the first nine months totalled 1,030, representing a gain of more than 6 per cent over the 968 recorded in 1950. In the same comparison total liabilities were \$18,595 thousand against \$18,239 thousand last year. The average liability of bankrupt firms in the nine-month period amounted to \$18,053, somewhat lower than the average of \$18,842 during the first nine months of 1950.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data for the past 15 months are not comparable with preceding periods. Since July 1950, proposals from insolvent persons are not included with the statistics of bankruptcies. In table 6 of this report, however, the number of proposals is shown so as to give a general impression of the trend.

Failures by Industries

During the first nine months of 1951, there were 435 insolvencies of trading establishments as compared with 377 in the same period of 1950, an advance of over 15 per cent. Failures in the construction field rose from 71 to 94 in the same comparison. Defaults of manufacturing enterprises totalled 193, exactly the same number as last year. Failures of service businesses fell off from 203 during the first nine months of 1950 to 193.

Failures by Economic Areas

Bankruptcies in the province of Quebec increased nearly 4 per cent, from 735 to 763, in the nine months' comparison, despite the fact that the 1951 figures do not include proposals, the bulk of which are registered in Quebec. The number of failures in Ontario rose 19 per cent, from 132 to 157. Bankruptcies in the Prairie region advanced from 23 to 33, and in the Atlantic Provinces from 30 to 34. By contrast, insolvencies in British Columbia declined from 48 to 43.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies' Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

Prepared in the Business Statistics Section.

COMMERCIAL FAILURES

UNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTS

FOURTH QUARTER AND YEAR, 1951

During 1951, the number of failures under the provisions of the Bankruptcy and Winding Up Acts was greater than in any other year since 1934. The annual total rose to 1,391, compared with 1,303 in 1950, an increase of over 7 percent. The estimated total of liabilities was \$5,912,000, about 4 percent greater than in the preceding year. Following the low levels of the war period, the number of bankruptcies has increased steadily since 1946, but is still well below that of the period prior to 1934. Defaulted liabilities have followed a similar trend. The average amount of liabilities per failure showed a moderate decline from the preceding year and, except for 1947, is the lowest of any postwar year.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data for the past 18 months are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with the statistics of bankruptcies. In some of the tables, however, the numbers are shown so as to give a general impression of the trend.

Failures by Industries.

The greatest number of failures usually occurs in the trade sector. During 1951, insolvencies of trading establishments numbered 370, compared with 302 in the preceding year. Bankruptcies of grocery and general stores totalled 121, an increase of 16 over 1950. Failures of clothing stores rose from 97 to 75. In manufacturing, 209 insolvencies were recorded compared with 257 in 1950. Defaults of service establishments numbered 255, a decline of 18 from the preceding year. Failures in construction rose sharply from 97 in 1950 to 126 in 1951, a gain of 30 percent.

Failures by Economic Areas.

Bankruptcies in Quebec increased nearly 8 percent over the preceding year despite the fact that the 1951 figures do not include proposals, the bulk of which are registered in Quebec. The number of failures in Ontario rose to 227 from 188 in 1950, an advance of over 22 percent. Insolvencies in the Prairie Provinces remained practically unchanged while defaults in the Atlantic region declined from 18 to 11. In British Columbia, the number of bankruptcies rose to 64, a gain of 5 percent.

Insolvency.

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

Prepared in the Business Statistics Section.

COMMERCIAL FAILURES

UNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTS

FIRST QUARTER, 1952

During the first quarter of 1952, the number of failures under the provisions of the Bankruptcy and Winding Up Acts was 404, only slightly above the 402 registered in the corresponding period last year. The data indicate a continuation, however, of the upward trend in the number of failures since the end of the last war. Estimated liabilities involved amounted to \$6.1 million as compared with \$6.7 million in the first quarter of 1951.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July, 1950 are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with the statistics of bankruptcies, but when such proposals are rejected by the creditors or fail in their purpose the proceedings may then come under the Bankruptcy Act. In Table 6 of this report, the number of proposals is shown so as to give a general impression of the trend.

Failures by Industries

During the first quarter of 1952, failures in the trade sector, where the greatest number of business mortalities usually occurs, totalled 167 compared with 168 in the same period last year. Bankruptcies of manufacturing establishments numbered 74, a decline of 5 from last year. Service insolvencies increased from 77 in the first quarter of 1951 to 85 in 1952. Failures in the construction field declined by 1/3 to 26 in the same comparison.

Failures by Economic Areas

Bankruptcies in the Province of Quebec remained practically unchanged in the first three months, while failures in Ontario rose to 66 from 62 in the first quarter last year. Insolvencies in the Atlantic Provinces advanced from 13 to 16 while in the Prairie Provinces they declined from 13 to 9. In British Columbia the number of failures remained unchanged at 15.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies' Creditors' Arrangement Act, and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

COMMERCIAL FAILURES

UNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTS

SECOND QUARTER, 1952.

During the second quarter of 1952 failures under the provisions of the Bankruptcy and Winding Up Acts numbered 384 as compared with 321 in the corresponding period of 1951, an increase of nearly 20 percent. The estimated total of liabilities was \$7,335 thousand, or more than 26 percent higher, in the same comparison.

Failures during the first six months totalled 848, representing a gain of 17 percent over the 723 recorded in 1951. These figures reflect a continuation of the upward trend in the number of bankruptcies since the end of the last war. Total estimated liabilities in the six-month period were \$14,552 thousand as compared with \$12,484 thousand in the same period last year, an increase of 16 percent. The average liability per failure amounted to \$17,160 a little lower than the average of \$17,267 during the first six months of 1951.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July, 1950 are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with statistics of bankruptcies, but when such proposals are rejected by the creditors or fail in their purpose the proceedings may then come under the Bankruptcy Act. In Table 6 of this report, the number of proposals submitted is shown so as to give an indication of the trend.

Failures by Industries

During the first six months of 1952 there were 334 insolvencies of trading establishments as compared with 303 in the same period of 1951, an advance of 10 percent. Failures in the construction field declined slightly in the same comparison. Defaults of manufacturing enterprises totalled 167 compared with 137 last year. Failures of service businesses rose from 138 during the first six months of 1951 to 149.

Failures by Economic Areas

Bankruptcies in the Province of Quebec increased 21 percent, from 529 to 641 in the six months comparison. The number of failures in Ontario rose from 112 to 128, a gain of 14 percent. Insolvencies in the Atlantic Provinces increased from 23 in 1951 to 29 this year. By contrast, bankruptcies in the Prairie Provinces declined from 24 to 16 while failures in British Columbia showed little change.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies' Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

Prepared in the Business Statistics Section.

Vol. 31 No. 3

\$1.00 per Year

COMMERCIAL FAILURESUNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTSTHIRD QUARTER, 1952

During the third quarter of 1952, 305 failures were registered under the provisions of the Bankruptcy and Winding Up Acts, 7 fewer than the 312 recorded for the corresponding period last year. The estimated total amount of liabilities was \$6,763 thousand, an increase of more than 4% over the third quarter of 1951.

There was a total of 1169 failures during the first nine months of 1952 representing an advance of over 13% over the 1030 recorded for the same period last year. The upward trend in bankruptcies observable since the end of the last war has thus continued in 1952. Total estimated liabilities for the nine months were \$22,015 thousand, 16% above the corresponding total for 1951. The average liability per failure during the first three quarters was \$18,832 somewhat higher than the average of \$18,401 shown last year.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July 1950 are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with statistics of bankruptcies, but when such proposals are rejected by the creditors or fail in their purpose the proceedings may then come under the Bankruptcy Act. In Table 6 of this report, the number of proposals submitted is shown so as to give an indication of the trend.

Failures by Industries.

There were 451 insolvencies of trading establishments during the first nine months of 1952, as compared with 435 for the same period last year. In the same comparison, failures of manufacturing enterprises rose from 193 to 236 and defaults of service businesses from 192 to 210. Failures in the construction industry, however, declined from 94 to 86.

Failures by Economic Areas.

There were 894 bankruptcies in the Province of Quebec during the nine-month period, an advance of more than 17% over 1951. The number of failures in Ontario rose by nearly 13% in the nine months comparison, from 157 to 177. Bankruptcies in the Atlantic Provinces showed little change, and failures in the Prairie Provinces decreased from 33 to 22. In British Columbia, 43 bankruptcies were recorded during the first nine months, the same number as in the corresponding period of 1951.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies' Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

COMMERCIAL FAILURESUNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTSFOURTH QUARTER AND YEAR, 1952

During 1952 the total number of failures under the provisions of the Bankruptcy and Winding Up Acts rose to 1,509, or nearly 8 percent higher than the 1951 total of 1,399. The 1952 figure was the highest recorded since 1934. The estimated total of liabilities was \$29,658,000, over 14 percent greater than in 1951. Following the low levels of the war period, the annual number of bankruptcies in Canada has increased steadily since 1946, but is still well below the totals recorded in the early 1930's. The yearly total of defaulted liabilities has followed a similar trend. The average liability per failure was slightly higher in 1952 than during the previous year.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July, 1950, are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with the statistics of bankruptcies, but when such proposals are rejected by the creditors or fail in their purpose, the proceedings may then come under the Bankruptcy Act. In table 10 of this report the number of proposals is shown so as to give a general impression of the trend.

Failures by Industries

As in the past, the greatest number of failures occurred in the trade sector, where there were 569 insolvencies as compared with 570 in 1951. Bankruptcies of groceries and general stores declined moderately, as did failures of clothing stores. Insolvencies of manufacturing establishments, however, rose from 269 in the previous year to 305. Defaults of service establishments numbered 279, as compared with 255 in 1951. Bankruptcies of "Other" establishments also recorded a marked advance.

Failures by Economic Areas

Insolvencies in Quebec rose by over 14 percent from 1,022 in 1951 to 1,167 last year. Failures in most other provinces showed declines in the same comparison, with the Ontario total dropping from 227 to 220, and failures in British Columbia falling off from 64 to 48. There were 34 bankruptcies in the Prairie region as compared with 42 in 1951. Similarly the number of failures in the Atlantic area decreased from 44 to 40.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

Prepared in the Business Statistics Section.

\$1.00 per Year

COMMERCIAL FAILURESUNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTSFIRST QUARTER, 1953

During the first quarter of 1953, the number of failures under the provisions of the Bankruptcy and Winding Up Acts was 382, compared with 470 during the same period last year. This represented a decline of 19 per cent and was the first reversal of the upward trend in first quarter comparisons since 1946. Estimated liabilities involved amounted to \$7,151 thousand compared with \$7,285 thousand in the first quarter of 1952.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July, 1950 are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with the statistics of bankruptcies, but when such proposals are rejected by the creditors or fail in their purpose, the proceedings may then come under the Bankruptcy Act. In table 6 of this report, the number of proposals is shown so as to give a general impression of the trend.

Failures by Industries

The number of bankruptcies in all recorded industrial classifications except mining showed a decline in the first quarter, compared with the corresponding period last year. Failures in the trade sector, where the greatest number of business mortalities usually occurs, totalled 146 compared with 186 in the first quarter of 1952. Bankruptcies of manufacturing establishments declined from 91 to 85, and service insolvencies dropped from 86 to 60. Failures in the construction field numbered 25 compared with 33 last year.

Failures by Economic Areas

The number of bankruptcies in the Province of Quebec declined 20 per cent in the first quarter comparison, from 357 in 1952 to 287 this year. Failures in Ontario totalled 49 against 69 in the first three months last year. In the Atlantic Provinces, insolvencies declined from 16 to 8 in the same comparison. By contrast, failures in the four Western Provinces rose from 28 to 38 in the first quarter.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies' Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

\$1.00 per Year

COMMERCIAL FAILURESUNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTSSECOND QUARTER, 1953

During the second quarter of 1953, the total number of failures under the provisions of the Bankruptcy and Winding Up Acts was 351, as compared with 394 in the same period last year. This represented a decline of 11 per cent and followed a drop of 19 per cent in the first quarter comparison. Estimated liabilities involved amounted to \$8,717 thousand compared with \$8,384 thousand in the second quarter of 1952.

Failures in the first six months of 1953 numbered 733, more than 15 per cent less than the 864 recorded in the first half of the previous year. This represented the first reversal of the upward trend in half-year comparisons since 1946. Total estimated liabilities over the six-month period were \$15,868 thousand as compared with \$15,669 thousand in the same period last year, a small gain of 1 per cent. The average liability per failure was \$21,648, considerably higher than the average of \$18,134 in the first six months of 1952.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July 1950 are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with the statistics of bankruptcies, but when such proposals are rejected by the creditors or fail in their purpose, the proceedings may then come under the Bankruptcy Act. In table 6 of this report, the number of proposals is shown so as to give a general impression of the trend.

Failures by Industries

Bankruptcies of manufacturing establishments totalled 158 in the first half of 1953, an appreciable decline from 174 in the same period last year. Failures in the trade sector, where the greatest number of business mortalities usually occurs, dropped from 338 to 287 in the same comparison. Service insolvencies fell off to 125 as compared with 150, while failures in the construction field stood at 53 as compared with 65 in the first six months of 1952.

Failures by Economic Areas

The total number of bankruptcies in the province of Quebec, during the first six months of 1953, was 541, a decline of nearly 17 per cent from the 651 recorded in the same period of the previous year. Failures in Ontario dropped from 130 to 112. Insolvencies in the Atlantic Provinces declined from 30 to 15 in the same comparison. By contrast, failures in the four Western Provinces rose from 53 to 65.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies' Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

COMMERCIAL FAILURES

DOMINION BUREAU OF STATISTICS

Research and Development Division

OTTAWA

Published by Authority of the Rt. Hon. C. D. Howe, Minister of Trade and Commerce

Vol. 32 No. 3

\$1.00 per Year

COMMERCIAL FAILURESUNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTSTHIRD QUARTER, 1953

During the third quarter of 1953, 394 failures were registered under the provisions of the Bankruptcy and Winding Up Acts, considerably more than the 300 recorded for the corresponding period last year. The estimated total amount of liabilities was \$8,075 thousand representing an increase of over 19 per cent over the third quarter of 1952.

Failures in the first nine months of 1953 numbered 1,127, a decline of about 3 per cent from the 1,164 recorded for the same period of 1952, as the upward trend in bankruptcies observable since the end of the last war was interrupted in the first six months of the present year. Total estimated liabilities for the nine months, however, were \$23,943 thousand, nearly 7 per cent above the corresponding total for 1952. The average liability per failure during the first three quarters was \$21,245, appreciably higher than the average of \$19,261 during the same period last year.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July 1950 are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with statistics of bankruptcies, but when such proposals are rejected by the creditors or fail in their purpose the proceedings may then come under the Bankruptcy Act. In Table 6 of this report, the number of proposals submitted is shown so as to give an indication of the trend.

Failures by Industries

There were 454 insolvencies of trading establishments during the first nine months of 1953, showing little change from the 448 recorded during the same period of 1952. In the same comparison, failures of manufacturing enterprises were practically unchanged at 237 as compared with 236 last year. Defaults of service businesses declined from 210 in 1952 to 197, and failures in the construction industry rose slightly from 86 to 88.

Failures by Economic Areas.

There were 824 bankruptcies in Quebec during the nine-month period a decline of over 7 per cent from 1952. The number of failures in Ontario fell off slightly from 176 to 173 in the same comparison. Bankruptcies in the Atlantic Provinces dropped fairly sharply from 33 to 22. By contrast, failures in the Prairie Provinces rose steeply from 22 to 56. In British Columbia, 52 bankruptcies were recorded during the first nine months, compared with 43 during the same period last year.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

Prepared in the Business Statistics Section.

COMMERCIAL FAILURES IN CANADA

BY QUARTERS

DOMINION BUREAU OF STATISTICS

Research and Development Division
OTTAWA

Published by Authority of the Rt. Hon. C. D. Howe, Minister of Trade and Commerce

Vol. 32 No. 4, Fourth Quarter and Year, 1953.

Price: \$1.00 per Year, 10¢ per copy

COMMERCIAL FAILURESUNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTS

During 1953, the total number of failures recorded under the provisions of the Bankruptcy and Winding Up Acts rose to 1,657. This was nearly 10 per cent higher than the 1952 total of 1,509, and was the highest recorded since 1933. The estimated total of liabilities was \$32.8 million, almost 11 per cent larger than in the preceding year. After declining to a very low level during the second World War, the annual number of bankruptcies in Canada has increased steadily since 1946, but is still well below the totals recorded in the early 1930's. The yearly aggregate of defaulted liabilities has followed a similar trend. Average liability per failure was slightly higher in 1953 than during the previous year.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July 1950 are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with the statistics of bankruptcies, but when such proposals are rejected by the creditors or fail in their purpose, the proceedings may then come under the Bankruptcy Act. In tables 1 and 10 of this report the number of proposals is shown so as to give a general impression of the trend.

Failures by Industries

As in previous years, the greatest number of failures occurred in the trade sector, where there were 650 insolvencies as compared with 569 in 1952. The majority of trades recorded increases, with the largest advances occurring in general stores, clothing stores, electrical appliance stores and jewelry stores. Insolvencies of manufacturing establishments rose from 305 last year to 359. In this group, textile firms recorded the largest increase over 1952. Defaults of service establishments numbered 286, as compared with 279 in 1952. Bankruptcies of "Other" establishments also rose slightly, from 356 to 362.

Failures by Economic Areas

During 1953, 1,221 of the 1,657 Canadian insolvencies occurred in Quebec, as compared with 1,167 in 1952. Failures in most other provinces also showed increases, with bankruptcies in Ontario rising from 220 in the preceding year to 255, and in British Columbia from 48 to 72. In the same comparison, failures in the Prairie Provinces advanced from 34 to 79, while those in the Atlantic region declined from 40 to 30.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies' Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

Prepared in the Business Statistics Section, Research and Development Division.

COMMERCIAL FAILURES

UNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTS

During the first quarter of 1954, the number of failures under the provisions of the Bankruptcy and Winding Up Acts jumped sharply to 680, compared with 382 during the same period last year. Estimated liabilities involved amounted to \$17,660,000 compared with \$7,151,000 in the first quarter of 1953 a gain of 147 per cent. The average value of liabilities per failure rose from \$18,700 to nearly \$26,000.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July, 1950 are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with the statistics of bankruptcies, but when such proposals are rejected by the creditors or fail in their purpose, the proceedings may then come under the Bankruptcy Act. In table 6 of this report, the number of proposals is shown so as to give a general impression of the trend.

Failures by Industries

The number of bankruptcies in all recorded industrial classifications showed increases in the first quarter comparison. Failures in the trade sector where the greatest number of business mortalities usually occurs, more than doubled and accounted for over one-half the increase in total failures. Marked increases occurred in the clothing, automobile and electric apparatus businesses. Bankruptcies of manufacturing establishments advanced from 85 in the first three months last year to 127 in the first quarter of 1954. Service insolvencies rose considerably from 60 to 110 in the same comparison. Failures in the construction field numbered 38 compared with 25 in the same period of 1953.

Failures by Economic Areas

The number of bankruptcies in the Province of Quebec advanced from 287 to 505 in the first quarter comparison and accounted for the major part of the increase in the national total. Failures in Ontario more than doubled, rising from 49 to 104. In the Atlantic Provinces, insolvencies numbered 15 against 8 in the same period last year, and in the four Western Provinces the number of failures increased to 56 from 38 in the first quarter of 1953.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies' Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

Prepared in the Business Statistics Section, Research and Development Division.

COMMERCIAL FAILURES

UNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTS

During the second quarter of 1954, the total number of failures under the provisions of the Bankruptcy and Winding Up Acts, although showing the usual seasonal decline from the first quarter, rose sharply when compared with the second quarter of 1953. In the second quarter comparison, number of failures increased from 351 last year to 530 this year, or more than 50 per cent. Estimated liabilities involved amounted to \$15,-209,000 compared with \$8,717,000 in the first quarter last year, a gain of nearly 75 per cent. The average liability per failure rose from \$24,800 to \$28,700.

Failures in the first six months of 1954 numbered 1,210, about 65 per cent more than the 733 insolvencies recorded in the first half of last year. Total estimated liabilities over the six-months period were \$32,868,000, more than double the total for the first half of 1953.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July 1950 are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with the statistics of bankruptcies, but when such proposals are rejected by the creditors or fail in their purpose, the proceedings may then come under the Bankruptcy Act. In table 6 of this report, the number of proposals is shown so as to give a general impression of the trend.

Failures by Industries

The number of failures in all recorded industrial classifications showed increases in the half-year comparison. Bankruptcies of manufacturing establishments totalled 226 compared with 158 in 1953. Failures in the trade sector, where the greatest number of business mortalities usually occurs rose from 287 to 530 in the same comparison. Service insolvencies increased in number to 209 from 125 last year.

Failures by Economic Areas

Bankruptcies in the province of Quebec numbered 896 during the first six months of this year compared with 541 in the first half of 1953. Failures in Ontario rose from 112 to 192 and in the Atlantic Provinces from 15 to 24. Insolvencies in the four Western Provinces advanced from 65 to 98 in the same comparison.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies' Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

Prepared in the Business Statistics Section, Research and Development Division.

COMMERCIAL FAILURES

UNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTS

During the third quarter of 1954, the number of failures under the provisions of the Bankruptcy and Winding Up Acts was 465. This represented a decline from the previous quarter but was 18 per cent above the total of 394 recorded for the third quarter of 1953. The total estimated liabilities involved amounted to \$10,688,000 as compared with \$8,075,000 in the same quarter last year, an increase of 32 per cent. The average liability per failure rose from \$20,500 in the third quarter of 1953 to \$23,000.

Failures in the first nine months of 1954 numbered 1,684, nearly 50 per cent above the 1,127 insolvencies recorded in the same period last year. Total estimated liabilities during the nine-month period were \$43,557,000 about 82 per cent greater than the corresponding 1953 total of \$23,943,000.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July 1950 are not comparable with preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are normally included with the statistics of bankruptcies but when such proposals are rejected by the creditors or fail in their purpose, the proceedings may then come under the Bankruptcy Act. In Table 6 of this report, the number of proposals is shown so as to give a general impression of the trend.

Failures by Industries

The number of failures in all the main industrial groups during the first nine months of 1954 showed advances over the previous year. There were 718 insolvencies among trading establishments, an increase of 58 per cent over the corresponding period of 1953. In the same comparison failures rose from 237 to 311 in the manufacturing field, from 197 to 307 among service establishments, and from 88 to 96 in the construction industry.

Failures by Economic Areas

Bankruptcies in the province of Quebec numbered 1,218 during the first nine months of 1954 as compared with 824 in the same period last year. In this comparison, failures in Ontario advanced from 173 to 301, and in the Atlantic Provinces from 22 to 35. Insolvencies in the Western Provinces rose from 108 to 130.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies' Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.

Prepared in the Business Statistics Section, Research and Development Division.

COMMERCIAL FAILURES

UNDER THE PROVISIONS OF THE BANKRUPTCY AND WINDING UP ACTS

During 1954, the total number of failures recorded under the provisions of the Bankruptcy and Winding Up Acts rose to 2,278. This represented a 37% increase over the 1953 total of 1,657 and was the highest in the postwar period. The estimated total of defaulted liabilities was \$53,142,000 compared with \$32,818,000 in the preceding year. After declining to a very low level during the second World War, the number of Canadian bankruptcies recorded annually has increased steadily since 1946. The yearly aggregate of defaulted liabilities has followed a similar trend. Average liability per failure was about 18 per cent higher in 1954 than during the previous year.

Owing to changes in the administration of bankruptcies as introduced by the Bankruptcy Act of 1949, the data since July 1950 are not comparable with that of preceding periods. In the third part of the Act, provision is made for proposals from insolvent persons. Agreements made under this method are not normally included with the statistics of bankruptcies, but when such proposals are rejected by the creditors or fail in their purpose, the proceedings may then come under the Bankruptcy Act. In tables 1 and 10 of this report the number of proposals is shown so as to give a general impression of the trend.

Failures by Industries

As in previous years, the greatest number of failures occurred in the trade sector, where there were 973 insolvencies as compared with 650 in 1953. Nearly every type of trading establishment showed more failures than during the previous year, particularly general stores, groceries, confectionery stores, clothing stores and automobile dealers. Insolvencies of manufacturing enterprises rose from 359 in the previous year to 416, with wood and paper products establishments recording a substantial increase over 1953. Defaults of service businesses numbered 408, up considerably from 286 in the preceding year. Bankruptcies of "other" establishments rose from 362 to 481.

Failures by Economic Areas

During 1954, 1,645 of the 2,278 Canadian insolvencies occurred in Quebec, as compared with 1,221 in 1953. Failures in Manitoba and Newfoundland were unchanged from the previous year, while all other provinces showed increases. Insolvencies in Ontario rose sharply from 255 to 414. Failures in the Atlantic region advanced from 30 to 45, and those in the Prairie Provinces rose from 79 to 101. Bankruptcies in British Columbia advanced only fractionally in this comparison.

Insolvency

It must be emphasized that insolvencies can occur through other means than the Bankruptcy and Winding Up Acts. Relevant legislation includes the Farmers' Creditors' Arrangement Act, the Companies' Creditors' Arrangement Act and various provincial Bulk Sales Acts. Statistics in this report relate to the Bankruptcy and Winding Up Acts only.
